## SET B

### PROJECT APPROVAL FORM

<b>Project Title:</b>	02 Hartung Theater New Elevator and Universal Accessibility Improvements.	<b>Institution/Agency:</b>	University of Idaho
		<b>Fiscal Year:</b>	FY2023
		<b>Estimated Total Cost:</b>	\$619,000
		<b>Budget Year Request:</b>	\$619,000

This project installs an elevator for the Hartung Theater in accordance with Americans with Disabilities Act (ADA) requirements. The Hartung Theater Building was originally constructed in the 1970's. It serves as the home for the university's Department of Theatre.

Hartung Theater does not have any existing elevator. The back of house is comprised of three levels and includes a classroom on the upper level. There is no universal access to the back of house on the main level and access to the lower and upper levels are limited to stairways. And yet, the Department of Theatre provides general education academic programming on all three levels. Much of this programming is requisite to the degree offerings of the department, and there is no alternate location in which programmatic accommodation can be provided. Therefore, it is imperative that access be provided.

This project provides a new elevator as well as universal accessibility improvements such that access may be provided to all three levels of the Hartung Theater back of house.

Proposed work includes construction of an exterior addition and installation of a three-stop elevator on the northwest corner of the Hartung Theater building. The existing stair will need to be reconfigured to allow for the installation of the elevator and its associated lobbies. The doors and hardware at the northwest entrance will need to be reconfigured to allow for code-compliance entry to the building. Lastly, a new, accessible concrete pathway will need to be constructed to the Stadium Way right of way to allow for an accessible approach to this revised entry and new elevator. It is assumed that the accessible pathway will require ramps with associated handrails along portions, but perhaps not all, of its length

Full universal accessibility within the Hartung Theater to the spaces in which academic programming is offered is a university priority. Universal accessibility is an important element to support long-term use of the facility. This project is consistent with the goals of the university's strategic academic goals and its strategic plan. Further, this project is in alignment with the university's Long Range Campus Development Plan (LRCDP).

Year of Original Request: FY2018
