2023 Impact

University of Idaho Extension helped agricultural producers through personal contacts, as well as programming such as beef school and online pesticide applicator training to obtain licensing credits.

4-H in Clark County

The 4-H program is growing in Clark County. This year many day camps were offered that taught youth about STEM (science, technology, engineering and math) such as Lego robotics and Outside the Box kits where they could learn about plant science, soil science, model rockets, cooking, art, and much more. Animal projects remain a popular project that is ongoing every year.

On the Horizon

UI Extension, Clark County welcomed a new 4-H coordinator, Brittany Park, to lead 4-H in the county. She has recently become certified to teach 4-H shooting sports and will begin to offer that programming to rural youth in the coming year.
