Skills*

Identifying Idaho's Trees

Because we have such a varied range of geography, soils, and precipitation patterns, Idaho has a wider variety of native trees than most other Rocky Mountain states. The first step in caring for these trees, whether they be in a landscape or in a forest, is correct species identification.

Distinguishing between Idaho's trees can be a daunting task for beginners. Through a combination of images and live samples, *Identifying Idaho's Trees* will help participants quickly identify Idaho's most common native trees, including:

- lodgepole pine
- ponderosa pine
- western white pine
- western larch
- Douglas-fir
- Engelmann spruce
- grand fir
- subalpine fir

- western redcedar
- western hemlock
- pacific yew
- black cottonwood
- quaking aspen
- paper birch
- red alder

Identifying Idaho's Trees will be held on **Saturday, November 23, 2024 from 9:00 am to 12:00 pm** at the UI Sandpoint Organic Agriculture Center (10881 N Boyer Road in Sandpoint)

Turning Idaho Trees into Wreaths . . .

This program will be followed by an afternoon workshop at the same site on making wreaths. Registration for that program is separate and available online (go to <https://marketplace.uidaho.edu>, then scroll to and click on "University of Idaho Extension: Panhandle Forestry") Otherwise, register through the UI Extension Office, in Sandpoint (see this flyer's registration panel).

Identifying Idaho Trees has limited space, so please register as soon as possible to assure your place and help us plan. To register online go to: <https://marketplace.uidaho.edu/> then scroll to and click on "University of Idaho Extension: Panhandle Forestry". Otherwise, return this form on the back of this flyer with a check (\$10/person) to: University of Idaho Extension - Bonner County Office, 4205 N. Boyer, Sandpoint, ID 83864 Phone: (208) 263-8511.
