## *Accident Alcohol and Controlled Substances – Delay of Test*

Post-Accident Testing must be performed as soon as possible after an accident that requires such testing. If Post-Accident controlled substances testing is not performed within 32 hours following the accident and Post-Accident alcohol testing is not performed within two hours after the accident and no later than eight hours after the accident, no further attempts to administer these tests may be taken.

If unable to conduct the testing within those time frames, please use this form to record the reasons the test(s) were not administered (to be completed by the supervisor).
