

Faculty Application for Staff Support for Service Learning

Requests for service learning staff support are limited to faculty who utilize service learning in academic courses. Staff assistance is for direct support of service learning related activities within a class and is contingent upon available staff resources within the Service Learning unit. Evaluation of requests will be made on a rolling basis and will begin immediately.

Your class must meet the following requirements to be considered for staff support:

- *Student placements meet real community or school needs*
- *The service is integrated into the student's academic coursework (e.g., the service is linked to the academic learning objectives of the course).*
- *There is time in the classroom and/or class assignments for structured reflection on the service experience.*

Date: _____

Applicant/Instructor: _____

Email: _____ Phone: _____

Office location: _____

Course title: _____ Course number: _____

Department: _____

Approx. number of hours (indicate per week or semester) of staff assistance needed: _____

Signature: _____

*** Please complete page two of this application and email in its entirety to:
servicelearning@uidaho.edu*

1) Describe briefly how service learning will be incorporated into your class. This could include some or all of the following:

- a. a description of the service components location/setting
- b. nature of the service activities/projects
- c. how the service is integrated with course goals and objectives
- d. how reflections on the service experience are integrated into the course

2) Describe the type of staff support assistance needed and at what times during the semester.

3) Other information you want considered in the evaluation of your request and/or other information that will help us provide better assistance.
